

ALACRON

Software Overview

Overview

Alacron provides the complete software environment needed to get your machine vision or imaging application up and running quickly from concept to working high performance systems. O/S environments supported include Windows NT, WIN 2000, WIN XP, Solaris and Linux. Alacron's Code Development Tools provide all the facilities need to develop and debug code for simple framegrabbers to multiprocessor applications. The diagram below outlines the extensive suite of imaging and machine vision application tools and libraries that Alacron provides for rapid development.
